

EUROPEAN  
TECHNOLOGY  
PLATFORM  
FOR HIGH  
PERFORMANCE  
COMPUTING

ETP 4  
HPC

Building a globally competitive European  
world-class HPC technology value chain

EUROPEAN  
TECHNOLOGY  
PLATFORM  
FOR HIGH  
PERFORMANCE  
COMPUTING

# Motivation and context

## HPC ecosystem & H2020

What we do

# High-Performance Computing (HPC)

An essential tool for Science, Society and Industry

Supercomputers: essential tools for powering numerical simulation, data analytics and big data processing, machine learning and AI

## HPC

From leading edge to pervasive computing

A **strategic driver** to push advanced computing **beyond its limits** from core technologies to usage

# HPC : An enabler for all scientific fields

An essential tool for Science, Society and Industry

Life Sciences &  
Medicine

Earth Sciences

Astro, High Energy  
& Plasma Physics

Materials, Chemistry  
& Nanoscience

Engineering

Advances leading to:

- Improved Healthcare
- Better Climate Forecasting
- Superior Materials
- Sustainable Energy
- More Competitive Industry
- ...

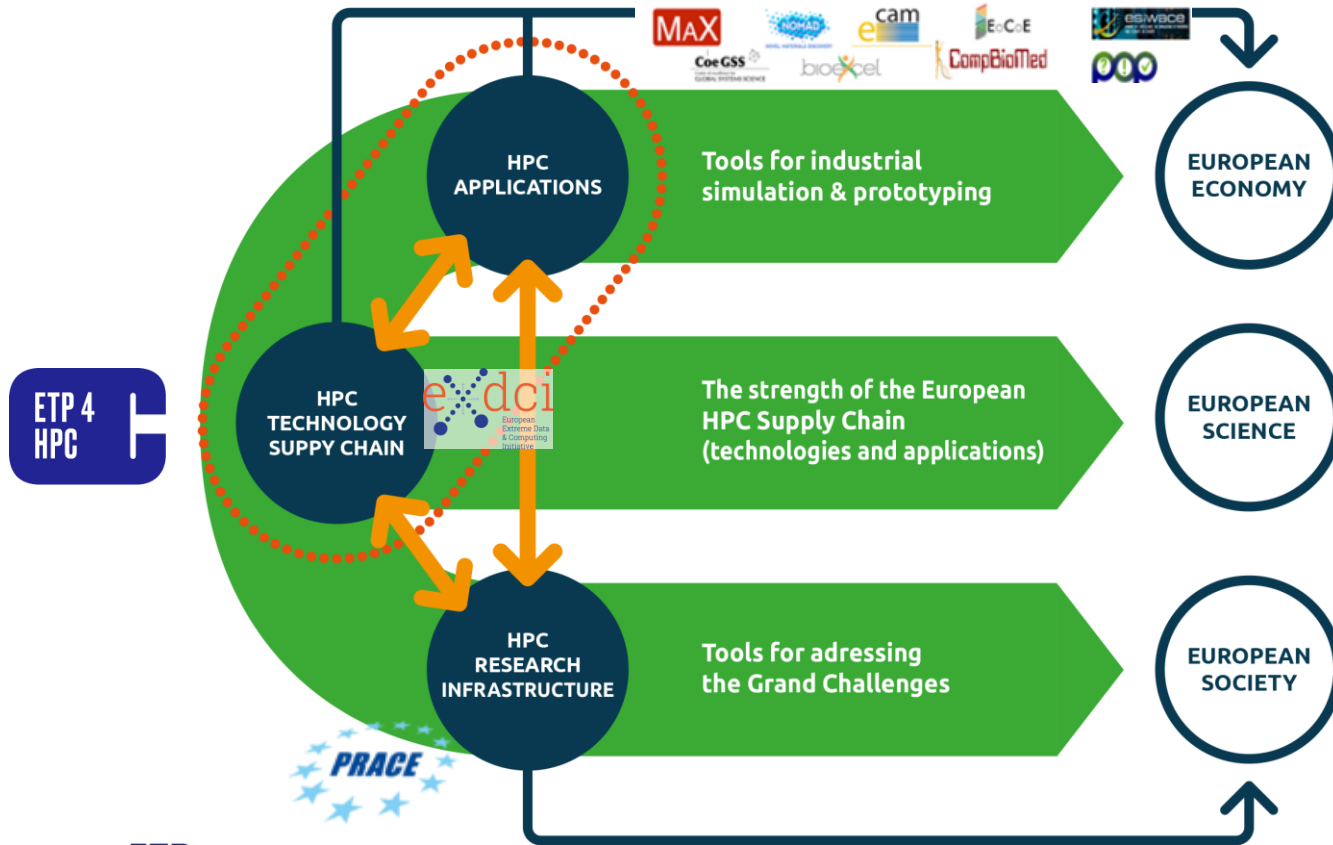

# Key document: 2012 EC Communication

EU needs independent access to HPC technologies, systems and services

=> ETP4HPC created end of 2012 to contribute to this objective

# European HPC Ecosystem

Approx. 21 FETHPC projects and 9 CoEs running

And more coming in 2018 - 2020

# EuroHPC Joint Undertaking

An integrated framework for HPC in Europe

# What is EuroHPC ?

<https://ec.europa.eu/digital-single-market/en/eurohpc-joint-undertaking>

- The Joint Undertaking EuroHPC is a legal entity
  - 03/07/2018: the European Parliament has voted in favor of the Commission's proposal for a Joint Undertaking
  - 28/09/2018: The proposal has been formally adopted by the Council of the European Union [http://europa.eu/rapid/press-release\\_IP-18-5864\\_en.htm](http://europa.eu/rapid/press-release_IP-18-5864_en.htm) and regulation published
  - Formal existence starts end of October 2018 (October 8 + 20 days) <https://eur-lex.europa.eu/legal-content/EN/TXT/PDF/?uri=OJ:L:2018:252:FULL&from=EN>
- Its governing members are:
  - the European Commission and
  - Participating States:  
Austria, Belgium, Bulgaria, Croatia, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, the Netherlands, Norway, Poland, Portugal, Romania, Slovakia, Slovenia and Spain

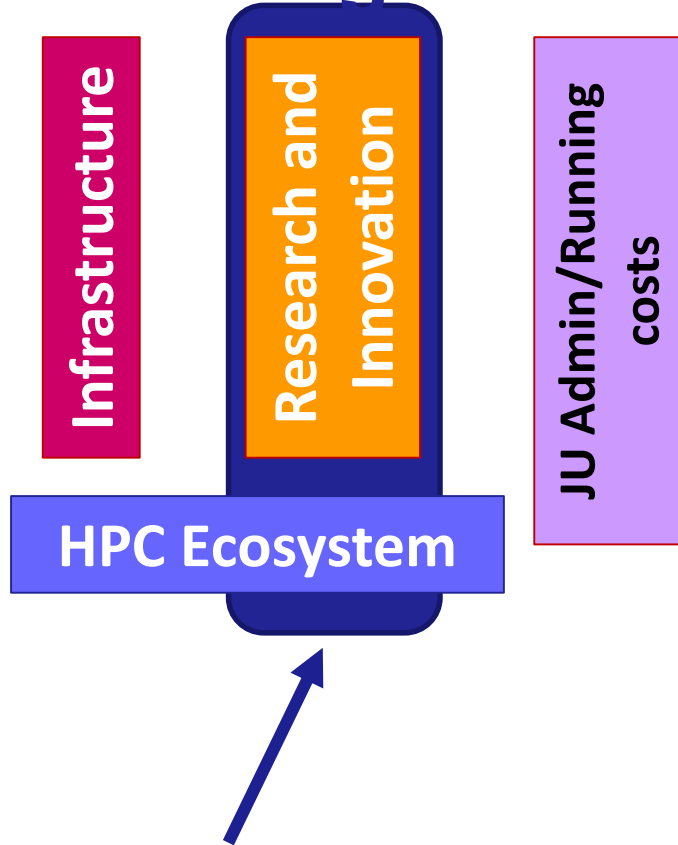

# Benefits of EuroHPC

**Bundled European efforts to keep up with the rest of the world:**

- **One integrated framework** for funding R&I projects AND procurements AND deployment of infrastructure for EU researchers and EU industry
- **Coordination in HPC strategies** and investments between the EC and Member States
- **Possibility of pooling financial resources** from the EC and from Member States

# One integrated framework

EC

## ■ The Infrastructure Pillar

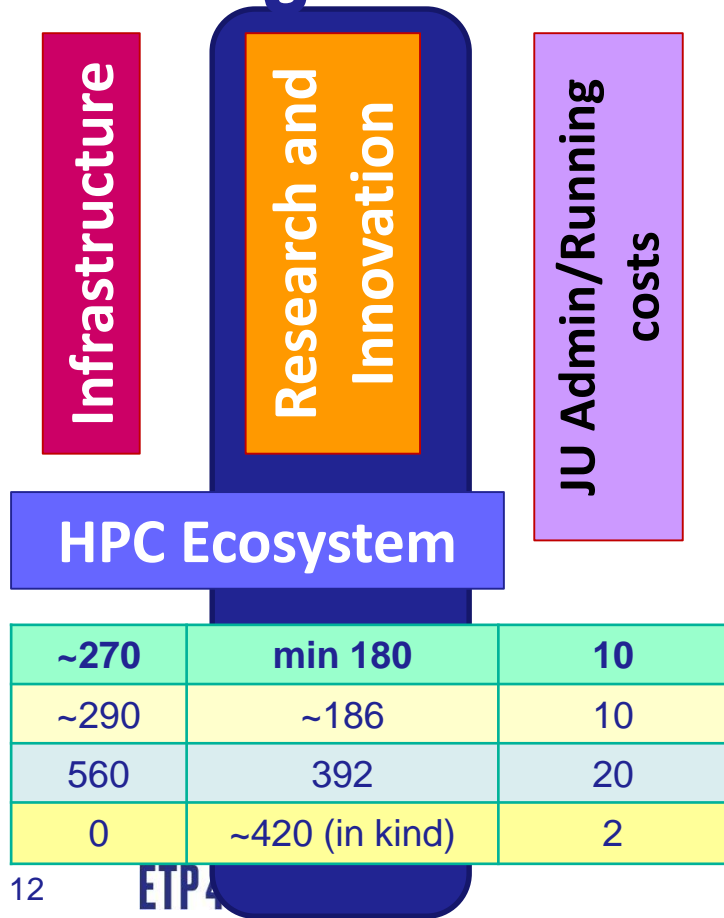

*Procurement of  $\geq 2$  pre-exascale machines and  $\geq 2$  petascale machines*

## ■ The Research and Innovation Pillar

R&I, exascale technologies and systems (incl. low-power processor); applications; skills

## ■ JU Admin/running costs

# Pooling resources

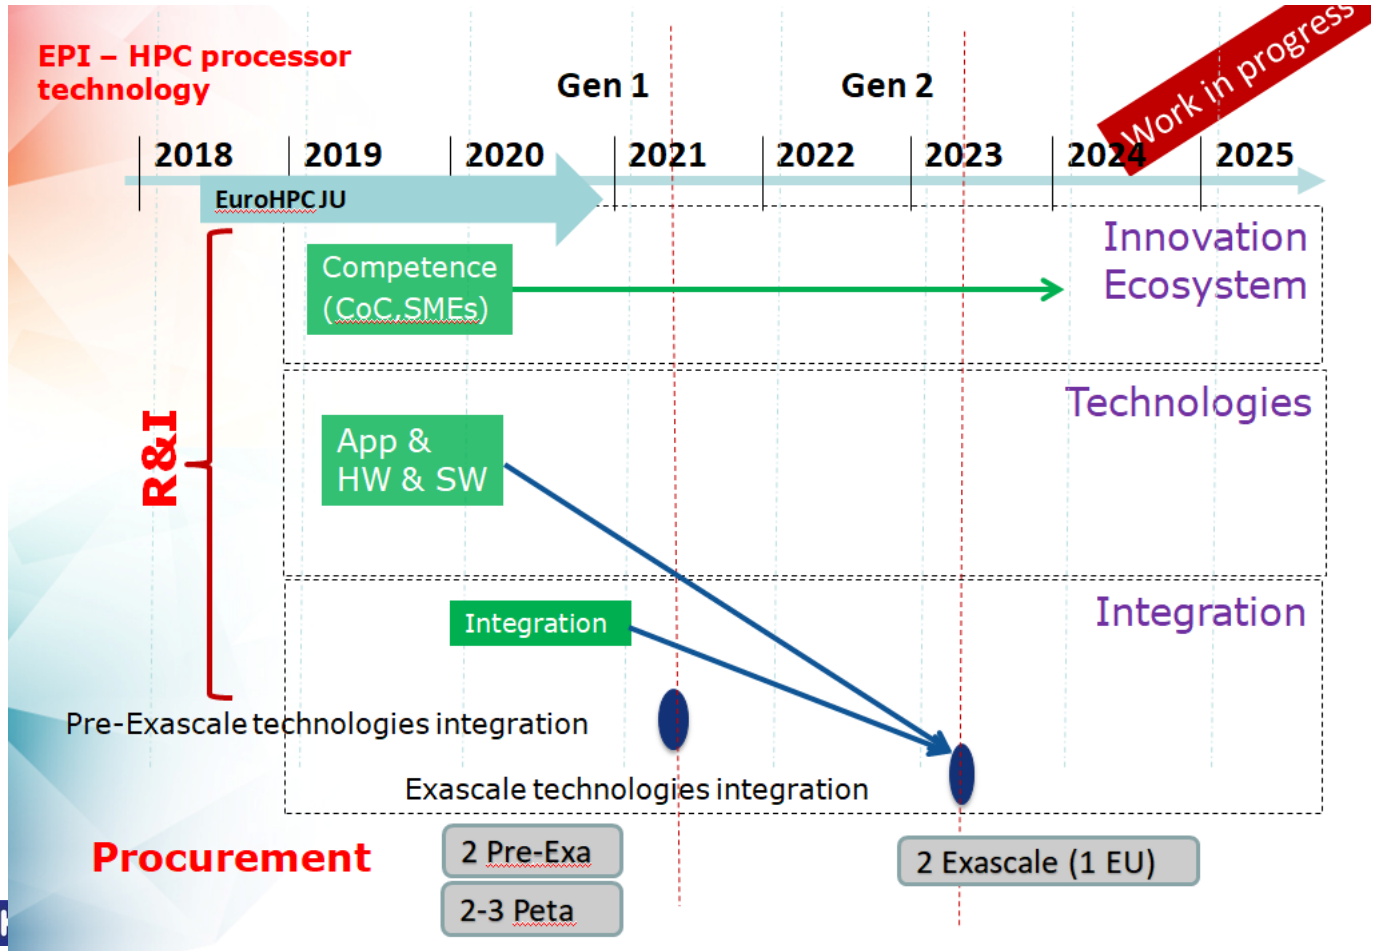

Indicative figures only for 2019 and 2020 activities (in M€)
